IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of:

JOSEPH KNOERLE ET AL.

Serial No.: 09/383,145

Filed: August 26, 1999

For: METHOD AND SYSTEM FOR
PRESERVING SERVICE NODE
RESOURCES AND REDUCING
CLIPPING EFFECT

RECEIVED

Art Unit: 2642 MAY 24 2004

Examiner: Karen L. Lee OFFICE OF PETITIONS

Attention: Kenneth A. Wieder

RENEWED PETITION TO WITHDRAW HOLDING OF ABANDONMENT UNDER 37
CFR §1.181

ATTN: Box Petitions **NO FEE**

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

RECEIVED

MAY 27 2004

Technology Center 2600

Sir:

Applicants respectfully request reconsideration of the Petition to Withdraw Holding of Abandonment filed on February 11, 2004 ("the Petition"), which was denied by the Decision on the Petition mailed on May 5, 2004.

Please charge any fees to Deposit Account No. 50-1390.

The following facts and attached documents summarize events that justify Applicants' request that the Petition be granted.

A. Exhibit A is a copy of the letter submitted to the Electronic Business Center of the U.S. Patent and Trademark Office ("USPTO") on January 10, 2003, attaching a diskette that contains a list of patent application serial numbers, including that of the above-identified application, to be linked to Customer No. 28970.

B. Attached as Exhibit B is an email received from the Electronic Business Center on January 16, 2003, in response to the letter of January 10, 2003. Attached to the email is a 45 page spreadsheet that indicated all the cases that was linked to Customer No. 28970. As indicated on page 11 of the spreadsheet, the above-identified application having the serial number of 09/383,145, was one of the cases that was linked to Customer No. 28970.

C. On March 5, 2003, the practitioner of record, Poh C. Chua, received the Office Action mailed on March 3, 2003. The cover page of this Office Action is attached hereto as Exhibit C. Please note that the Office Action correctly identifies the attorney of record as Poh C. Chua at Shaw Pittman, 2300 N Street, N.W., Washington, DC 20037. Please note this correspondence address was later changed, as indicated in paragraph H below.

D. Attached as Exhibit D is a copy of an Amendment that was filed on June 3, 2003, in response to the Official Action dated March 3, 2003. Customer No. 28970 was provided on the Amendment Transmittal Letter, and the correspondence address for the above-identified application was indicated to be Shaw Pittman LLP, 1650 Tysons Boulevard, McLean, VA 22102-4859. Also included in Exhibit D is a copy of the date stamped postcard that accompanied the Amendment.

E. Attached as Exhibit E are copies of the practitioner of record's "USPTO Daily Log" for the month of August, 2003. The log indicates that no Notice of Allowance was received in connection with the above-identified application.

F. Attached as Exhibit F is a copy of the file jacket of the above-identified application, showing that no Notice of Allowance was recorded thereon.

G. Attached as Exhibit G is a copy of the practitioner of record's docket for November 11-12, 2003, which would have indicated the deadline to pay the Issue Fee if the Notice of Allowance mailed August 11, 2003 was in fact received.

H. Attached as Exhibit H are copies of Notice of Customer Number Record Change mailed by the USPTO on November 26, 2002, December 18, 2002, April 1, 2003, and October 22, 2003. Each of these notices acknowledges that Customer Number 28970 is correctly associated with the correspondence address of Shaw Pittman, IP Group, 1650 Tysons Boulevard, McLean, VA 22102.

I. On February 9, 2004, one of Applicants' representatives, Mr. Brett Martin received a Notice of Abandonment dated February 4, 2004, allegedly for failure to pay Issue Fee as stated in the Notice of Allowance mailed August 11, 2003. For the first time, Applicants' representatives were advised that a Notice of Allowance was previously mailed by the USPTO. The Notice of Abandonment has a correspondence address of 1650 Tysons Boulevard, but it does not include the name of the law firm "Shaw Pittman." A telephone call by Ms. Yvette Parrish of Shaw Pittman to Ms. Cheryl Carmichael of the USPTO revealed that the correspondence address for the above-identified application was not correctly updated in the PALM database. Ms. Parrish informed Ms. Carmichael that the Notice of Allowance was not received as a result of the lack of update in the PALM database. A copy of the Notice of Abandonment dated February 4, 2004, is attached hereto as Exhibit I.

J. On February 11, 2004, Ms. Parrish checked the Patent Application Information Retrieval database (hereinafter "PAIR") and learned that the above-identified application was "invalid." A printout of the relevant PAIR data is attached hereto as Exhibit J.

Serial No.: 09/383,145
Art Unit: 2642

Attorney's Docket No.: BS99-010
Page 4

REMARKS

Applicants believe that the Notice of Allowance and Issue Fee Due might have been lost in the mail because of the lack of update in the PALM database. In view of the above facts, Applicants believe that the presumption that the Notice of Allowance and Issue Fee Due was mailed on August 11, 2003, has been overcome.

Further, the undersigned practitioner of record attests that:

- (1) The Notice of Allowance and Issue Fee Due mailed August 11, 2003, was not received by the practitioner of record; and
- (2) A search of the file jacket and docket records (see Exhibits F and G, respectively) indicates that the Notice of Allowance and Issue Fee Due mailed August 11, 2003, was not received.

Applicants respectfully conclude that the Notice of Allowance and Issue Fee Due mailed August 11, 2003, was lost in the mail and therefore not received by the practitioner of record. Accordingly, Applicants respectfully request that this Renewed Petition to Withdraw Holding of Abandonment be granted and that the Notice of Allowance be re-mailed so that Applicants can be given an opportunity to timely pay the Issue Fee.

Should there be any questions with regard to this Renewed Petition, please contact the undersigned.

SHAW PITTMAN LLP

Re: Data for Customer No. 28970

Dear Sirs:

Enclosed please find a 3.5 inch floppy diskette containing pending and granted applications filed with the U.S. Patent and Trademark Office on behalf of Shaw Pittman. A hard copy of this data is also enclosed herewith.

Please cancel all applications filed under Customer No. 28961 and move them to Customer No. 28970. The cases under Customer No. 28961 to be moved thus far are:

28961	09468887	12/22/1999	01/01/2001
28961	09893437	06/29/2001	01/01/2001
28961	09893909	06/29/2001	01/01/2001

I look forward to receiving the spreadsheet as uploaded with the USPTO. If you have any questions please feel free to contact Yvette M. Parrish at 703-770-7550.

Sincerely,

Aslan Baghdadi

Subject: Error report for customer number 28970

<<28970_address error report.xls>>

Mr. Baghdadi and Ms. Parrish

I have attached the "initial address error report" for customer number 28970 to this email for your perusal so that you may verify the accuracy of the spreadsheet.

This initial address report is the first step in the upload process. This report compares the "current" correspondence address of each application in the spreadsheet to the address for the customer number upload, which in this case is 28970. Any disparity is considered an error. Normally an address match between an application and the customer's number address is deleted from this report. The end result would be faxed to your location but due to this spreadsheet's large size that is impractical, thus the email.

Your next step is to verify that this is indeed what you want up to upload.

This report contains ALL the applications and associated data from the original spreadsheet. Two new columns have been added, the current address and name of firm or attorney. The spreadsheet can be sorted by any column for your validation process. Go through the report, delete any applications you DO NOT want uploaded. Change any application number you find in error.

Once the report is verified, return it via email to me along with a signed cover letter stating that the address error report has been verified. The cover letter can be faxed or attached with the spreadsheet. I will then proceed with the upload. Within 10 working days of the upload, a final report will be mailed to the location of customer number 28970. That report will list what was actually uploaded and what was not.

Any questions can be directed at the number below. Please be aware my working hours are from 4pm to midnight EST.

AMENDMENT

Box: Non-Fee Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Office Action mailed on March 3, 2003, please amend the above-identified application as follows:

No extension of time or other fees are believed to be due, except as detailed in the attached documents. However, any extension of time necessary to prevent abandonment is hereby requested, and any fee necessary for consideration of this response is hereby authorized to be charged to Deposit Account Number 50-1390.

IN THE CLAIMS:

Please amend claims 1-7, 9-12, 14-26, 28-29, 31-34, and 36-38, and please add new claims 41-45 as shown in the attached sheets. Please cancel claims 8, 13, 35, and 39-40.

REPLACEMENT CLAIMS

Please substitute the following claims for the pending claims with the same number.

1. (Currently Amended) A method for making simultaneous ringing calls comprising preserving resources in an advanced intelligent network telecommunication system having a first telephone connected to a service switching point, a second telephone, a service control point, and a service node, comprising the steps of:
 - (a) detecting an incoming call to the a first telephone by the a service switching point; determining by a service control point associated with the service switching point an operational status of a service node;
 - (b) checking by the service control point the a busy/idle status of the a second telephone associated with the first telephone if the service node is operational by the service control point; and
 - (c) generating an a first outgoing call to the first telephone and a second outgoing call to the second telephone by the service node if, but only if, the second telephone is idle.
2. (Currently Amended) The method of claim 1, wherein ~~said the~~ detecting step is performed by a trigger provisioned at the service switching point.
3. (Currently Amended) The method of claim 2, wherein ~~said the~~ trigger is a termination attempt trigger.

4. (Currently Amended) The method of claim 1, wherein ~~said the~~ checking step is performed by the service control point by sending a Monitor_for_Change message to, and by receiving a Status_Reported message from, the service switching point.
5. (Currently Amended) The method of claim 1, wherein ~~further comprising exchanging messages between~~ the service control point and the service node ~~exchange messages via X.25~~ interface.
6. (Currently Amended) The method of claim 1, wherein ~~said the~~ second telephone is a wireless telephone that is served by a home location register.
7. (Currently Amended) The method of claim 6, wherein ~~said the~~ checking step is performed by the service control point by sending an IS-41 LocationRequest message to, and by receiving an IS-41 LocationRequest Return Result message from, the home location register.
8. (Cancelled)
9. (Currently Amended) The method of claim 1, further comprising checking ~~the a~~ busy/idle status of the first telephone if the service node is operational.
10. (Currently Amended) The method of claim 9, wherein the first outgoing call and the second outgoing call to the second telephone is only are generated if both the first telephone and the second telephones are idle.

11. (Currently Amended) A method for providing simultaneous ringing service ~~in an advanced intelligent network telecommunication system having a primary wireline telephone connected to a first service switching point, a secondary telephone, and a database, comprising the steps of:~~

- (a) — associating the telephone numbers of ~~the~~ a primary telephone and a secondary telephone ~~telephones in the~~ a database;
- (b) — detecting an incoming call to the primary telephone;
determining an operational status of a service node;
- (c) — checking the busy/idle status of the primary telephone and the secondary telephone ~~telephones~~ if the service node is operational;
- (d) — generating by ~~a~~ the service node a first outgoing call to the primary telephone and a second outgoing call to the secondary telephone if, but only if, both the primary telephone and the secondary telephone ~~telephones~~ are idle; and
- (e) — upon answering by the primary telephone or the secondary telephone, connecting the incoming call to the telephone that has answered and canceling the call to the other telephone that has not answered.

12. (Currently Amended) The method of claim 11, wherein the database is maintained at a service control point ~~within the advanced intelligent network~~, and wherein ~~said~~ the detecting step is performed by a trigger provisioned at ~~said~~ a first service switching point associated with the primary telephone.

13. (Cancelled)

14. (Currently Amended) The method of claim ~~13~~ 12, wherein the secondary telephone is a wireline telephone that is connected to a second service switching point.

15. (Currently Amended) The method of claim 14, wherein ~~said the~~ checking step is performed by the service control point by sending Monitor_for_Change messages to, and by receiving Status_Reported messages from, ~~said the~~ first service switching point and ~~said the~~ second service switching ~~points~~ point.

16. (Currently Amended) The method of claim ~~13~~ 12, wherein ~~said the~~ secondary telephone is a wireless telephone line that is served by a home location register.

17. (Currently Amended) The method of claim 16, wherein ~~said the~~ checking step is performed by the service control point sending a Monitor_for_Change message to, and receiving a Status_Reported message from, ~~said the~~ first service switching point, and sending an IS-41 LocationRequest message to, and receiving an IS-41 LocationRequest Return Result message from, ~~said the~~ home location register.

18. (Currently Amended) The method of claim 17, wherein ~~said the~~ first outgoing call is generated about four seconds after ~~said the~~ second outgoing call is generated.

19. (Currently Amended) The method of claim ~~13~~ 11, further comprising ~~the steps of:~~

(f) ~~connecting the incoming call to the telephone that has answered;~~

(g) — keeping the incoming call connected through the service node for a predetermined duration; and

(h) — upon expiration of the predetermined duration, withdrawing the service node from the incoming call connection.

20. (Currently Amended) The method of claim 19, wherein ~~said the~~ predetermined duration is a tunable variable.

21. (Currently Amended) An advanced intelligent network telecommunication system comprising:

(a) — a first service switching point connected to a primary telephone of a subscriber, ~~said the~~ primary telephone having a primary telephone number;

(b) — a service control point having a database associating the primary telephone number with a secondary telephone number of a secondary telephone of the subscriber;

(c) — means for detecting an incoming call to the primary telephone;

means for determining an operational status of a service node associated with the service control point; and

(d) — means for checking ~~the~~ busy/idle status of the primary telephone and secondary telephone, telephones; and

(e) — ~~a service node having the capability of generating multiple calls simultaneously,~~
wherein when the incoming call to the primary telephone is detected, the service control point determines the operational status of the service node, and the service control point checks

the busy/idle status of the primary telephone and ~~the secondary telephone~~ telephones if the service node is operational, and the service control point forwards the incoming call to the service node for generating a first outgoing call to the primary telephone and a second outgoing call to the secondary telephone if, but only if, both the primary telephone and the secondary telephones telephone are idle.

22. (Currently Amended) The telecommunication system of claim 21, wherein ~~said the~~ detecting means is performed by a trigger provisioned at the first service switching point.

23. (Currently Amended) The telecommunication system of claim 22, wherein ~~said the~~ trigger is a termination attempt trigger.

24. (Currently Amended) The telecommunication system of claim 21, wherein ~~said the~~ secondary telephone is a wireline telephone connected to a second service switching point.

25. (Currently Amended) The telecommunication system of claim 24, wherein the busy/idle status checking means is performed by the service control point by sending Monitor_for_Change messages to, and by receiving Status_Reported messages from, the first service switching point and the second service switching ~~points~~ point.

26. (Currently Amended) The telecommunication system of claim 21, wherein ~~said~~ secondary telephone is a wireless telephone served by a home location register.

27. (Original) The telecommunication system of claim 26, wherein the busy/idle status checking means is performed by the service control point by sending a Monitor_for_Change message to, and by receiving Status_Reported message from, the first service switching point, and by sending an IS-41 LocationRequest message to, and by receiving an IS-41 LocationRequest Return Result message from, the home location register.
28. (Currently Amended) The telecommunication system of claim 21, wherein ~~said the~~ second outgoing call is generated about four seconds before ~~said the~~ first outgoing call is generated.
29. (Currently Amended) ~~An advanced intelligent network telecommunication system, A~~ telecommunication system comprising a service node, a first telephone, a switch associated with the first telephone, and a second telephone, wherein when the ~~service node first telephone~~ receives an incoming call from a caller the first telephone, the switch forwards the incoming call to the service node if the service node has been determined to be operational, the service node then generates a first outgoing call to the first telephone and a second an outgoing call to the second telephone if both the first telephone and the second telephone have been determined to be idle, and when one of the first telephone and the second telephone answers, the service node makes a connection between the caller and the telephone that answers, maintains the connection keeps the first and the second telephones connected for a predetermined duration, and before withdrawing from the connection after the predetermined duration has expired.

30. (Original) The telecommunication system of claim 29, wherein the predetermined duration is a tunable variable.

31. (Currently Amended) A method for providing simultaneous ringing service comprising to
~~a wireline telephone of an advanced intelligent network telecommunication system and a~~
~~wireless telephone of a wireless intelligent network, comprising the steps of:~~

(a) — associating ~~the a first telephone number of~~ telephone numbers of the a wireline
telephone and ~~the a~~ second telephone number of a wireless telephone in a database accessible by
a service control point;

(b) — detecting an incoming call to the wireline telephone;
determining by the service control point an operational status of a service node associated
with the service control point;

(c) — checking ~~the by the service control point~~ busy/idle status of the wireline telephone
and the wireless telephone if the service node is operational;

(d) — generating by ~~a the~~ service node a first outgoing call to the wireless telephone and
a second outgoing call to the wireline telephone if, but only if, both the wireline telephone and
the ~~secondary wireless~~ telephone are available to receive calls; and

(e) — after one of the wireline telephone and the wireless telephone answers ~~the~~
~~incoming call~~ one of the first outgoing call and the second outgoing call, connecting the
incoming call to the telephone that has answered and canceling the remaining one of the first
outgoing call and the second outgoing call to the telephone that has not answered.

32. (Currently Amended) The method of claim 31, wherein ~~said the~~ detecting step is performed by a trigger provisioned at a service switching point connected to the wireline telephone.
33. (Currently Amended) The method of claim 32, wherein ~~said the~~ trigger is a termination attempt trigger.
34. (Currently Amended) The method of claim 31, wherein ~~said the~~ checking step is performed by the service control point by sending a Monitor_for_Change message to, and by receiving Status_Reported message from, the service switching point, and by sending an IS-41 LocationRequest message to, and by receiving an IS-41 LocationRequest Return Result message from, a home location register serving the secondary wireless telephone.
35. (Cancelled)
36. (Currently Amended) The method of claim ~~35~~ 31, wherein the second outgoing call is generated about four seconds after the first outgoing call is generated.
37. (Currently Amended) The method of claim ~~35~~ 31, further comprising ~~the steps of:~~
- (f) ~~connecting the incoming call to the telephone that has answered;~~
 - (g) ~~keeping the incoming call connected through the service node for a predetermined~~
duration; and

(h) —upon expiration of the predetermined duration, withdrawing the service node from the incoming call connection.

38. (Currently Amended) The method of claim 37, wherein ~~said~~ the predetermined duration is a tunable variable.

39. (Cancelled)

40. (Cancelled)

41. (New) A method for making simultaneous ringing calls comprising:

detecting by a switch an incoming call from a caller telephone to a primary telephone of a subscriber;

querying a service control point by the switch for a secondary telephone associated with the subscriber;

determining by the service control point an operational status of a service node associated with the service control point;

checking by the service control point busy/idle status of the primary telephone and the secondary telephone if the service node is operational; and

generating by the service node a first ongoing call to the primary telephone and a second outgoing call to the secondary telephone if, but only if, both the primary telephone and the secondary telephone are idle.

42. (New) The method of claim 41, wherein the determining includes exchanging messages between the service control point and the service node.
43. (New) The method of claim 42, wherein the messages are exchanged via X.25 interface.
44. (New) The method of claim 41, further comprising:
- connecting the caller telephone to one of the primary telephone and the secondary telephone that answers one of the first outgoing call and the second outgoing call;
 - canceling the remaining one of the first outgoing call and the second outgoing call;
 - keeping the caller telephone and the one of the primary telephone and the secondary telephone connected through the service node for a predetermined duration;
 - and
 - upon expiration of the predetermined duration, withdrawing the service node from the connection.
45. (New) The method of claim 44, wherein the predetermined duration is a tunable variable.

REMARKS

Examiners Matar and Le are thanked for the courtesies extended to Applicants' representative during a telephone interview conducted on May 23, 2003. During the interview, although Examiners Le and Matar agreed that Harlow does not teach "generating an outgoing call . . . by the service node," the Examiners maintained their position that the claims were obvious in view of Harlow, as articulated in the Office Action mailed March 3, 2003. The examiners suggested that the pending claims be amended to include additional limitations so overcome Harlow. In follow-up telephone conversations on June 2 and 3, 2003 between Applicants' representative and Examiner Le, proposed amended claims were discussed. An agreement has been reached that the proposed amended claims would be allowable subject to the Examiners' review of the specification for support of the new limitations and an updated search to be conducted by the Examiners in view of the amendment presented herein.

Reconsideration of this application is respectfully requested in view of the foregoing amendment and the following remarks.

Claims 1-40 were pending in this application. In the foregoing amended, claims 1-7, 9-12, 14-26, 28-29, 31-34, and 36-38 have been amended, claims 8, 13, 25, and 39-40 have been cancelled, and claims 41-45 have been added. Accordingly, claims 1-7, 9-12, 14-34, 36-38, and 41-45 will be pending herein upon entry of this Amendment. For the reasons stated below, Applicants respectfully submit that all claims pending in this application are in condition for allowance.

In the Office Action mailed, claims 1-40 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Harlow. To the extent this rejection might still be applied to claims presently pending in this application, it is respectfully traversed.

In each of the pending independent claims 1, 11, 21, 29, 31, and 41, new limitations have been added. For example, each of the pending independent claims includes limitations that require (1) determination of an operational status of a service node after an incoming call is detected at a first telephone, and (2) checking of busy/idle status of a second telephone associated with the first telephone if the service node is operational. Combinations of these limitations are not taught or suggested by the prior art of record. Support for these limitations can be found in several places of the present application. For example, support can be found at lines 3-17 on page 6, from line 4 on page 11 to line 6 on page 12, and on Figure 2a.

For at least the reasons stated above, Applicants believe that the § 103 rejection has been overcome and that all pending claims are now in condition for allowance.

Should the Examiners have any questions or determine that any further action is desirable to place this application in even better condition for issue, the Examiners are encouraged to telephone Applicants' undersigned representative at the number listed below.

NOTICE OF ABANDONMENT

DATE MAILED:

ABANDONMENT
CONTACT PERSON IS
TOM HAWKINS
305-8380

This application is abandoned in view of:

p #12

- ☐ Applicant's failure to timely file a proper reply to the Office letter mailed on _____
- ☐ A reply (with Certificate of Mailing or Transmission of _____) was received on _____ which is after the expiration of the period for reply (including a total extension of time of _____ month(s)) which expired on _____
- ☐ A proposed reply was received on _____, but it does not constitute a proper reply under 37 CFR 1.113 to the final rejection.
(A proper reply under 37 CFR 1.113 to a final rejection consists only of: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114).
- ☐ A reply was received on _____, but it does not constitute a proper reply, or a *bona fide* attempt at a proper reply, to the non-final rejection. See 37 CFR 1.85(a) and 1.111. (See explanation in the last box below).
- ☐ No reply has been received.
- ☒ Applicant's failure to timely pay the required issue fee and publication fee, if applicable, within the statutory period of three months from the mailing date of the Notice of Allowance (PTOL-85).
- ☐ The issue fee and publication fee, if applicable, was received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the statutory period for payment of the issue fee (and publication fee) set in the Notice of Allowance (PTOL-85)(or Notice of Publication Fee Due).
- ☐ The submitted fee of \$ _____ is insufficient. A balance of \$ _____ is due.
The issue fee by 37 CFR 1.18 is \$ _____. The publication fee, if required, by 37 CFR 1.18(d) is \$ _____.
- ☒ The issue fee and publication fee, if applicable, have not been received.
- ☐ Applicant's failure to timely file corrected drawings as required by, and within the three-month period set in, the Notice of Allowability (PTOL-37).
- ☐ Proposed corrected drawings were received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the period for reply.
- ☐ No corrected drawings have been received.
- ☐ The letter of express abandonment which is signed by the attorney or agent of record, the assignee of the entire interest, or all the applicants.
- ☐ The letter of express abandonment which is signed by an attorney or agent (acting in a representative capacity under 37 CFR 1.34(a)) upon filing of a continuing application.
- ☐ The decision by the Board of Patent Appeals and Interferences rendered on _____ and because the period for seeking court review of the decision has expired and there are no allowed claims.
- ☐ The reason(s) below: _____

Petitions to revive under 37 CFR 1.137(a) or (b), or requests to withdraw the holding of abandonment under 37 CFR 1.181, should be promptly filed to minimize any negative effects on patent term.

Respond to the Notice of Abandonment by one of the following:

Petition To Withdraw Holding of Abandonment (See MPEP 711.03(c) I) and 37 CFR § 1.181) No fee required

Where an applicant contends that the application is not in fact abandoned (e.g., there is disagreement as to the sufficiency of the reply, or as to controlling dates), a petition under 37 CFR § 1.181(a) requesting withdrawal of the holding of abandonment is the appropriate course of action. Any petition under 37 CFR § 1.181, to withdraw the holding of abandonment not filed within 2 months of the mail date of a Notice of Abandonment may be dismissed as untimely under 37 CFR § 1.181(f).

In order for a petition to be granted, the evidence must be sufficient according to one of the following standards:

- 37 CFR § 1.8(b) Certificate of Mailing
- 37 CFR § 1.10 "Express Mail" mailing
- MPEP 503 Postcard Receipt as Prima Facie Evidence

Petition To Withdraw Holding Of Abandonment should be addressed as follows:

By mail: Commissioner For Patents, P.O. Box 1450, Mail Stop: Issue Fee, Alexandria, VA
22313-1450

By facsimile: 703-305-8755 or 703-305-4372

Petition To Withdraw Holding Of Abandonment Based On Failure To Receive Office Action (See MPEP 711.03(c) II). No fee required

Where an applicant contends that the original Notice of Allowance and Issue Fee Due was never received. If adequately supported, the Office may grant the petition and remail the Office action. The showing required establishing non-receipt of an Office communication must include a statement from the practitioner stating that the Office communication was not received and attesting to the fact that a search of the file jacket and docket records indicates that the Office communication was not received. A copy of the docket record where the nonreceived Office would have been entered had it been received and docketed must be attached to and referenced in practitioner's statement.

Petition should be addressed to the Technology Center handling the application as follows:

By mail: Commissioner For Patents, P.O. Box 1450, Alexandria, VA 22313-1450
(Mark attention of a particular office or individual)

By facsimile: Technology Center numbers posted at <http://www.uspto.gov/september1/faxnotice.htm>

Petition To Revive An Abandoned Application (See MPEP 711.03(c) III)

Where there is no dispute as to whether an application is abandoned (e.g. the applicant's contentions merely involve the cause of abandonment) a petition under 37 CFR § 1.137 (a) unavoidable or (b) unintentionally (accompanied by the appropriate petition fee) is necessary to revive the abandoned application.

Petitions under 37 CFR § 1.137 should be addressed to the Office of Petitions as follows:

By mail: Commissioner For Patents, P.O. Box 1450, Alexandria, VA 22313-1450

By hand: Crystal Plaza 4, Rm. 3C23, 2201 Clark Place, Arlington, VA

By facsimile: 703-308-6916

Petition For Revival Of An Application For Patent Abandoned Unavoidably Under 37 CFR § 1.137(a) and Unintentionally Under 37 CFR 1.137(b), forms available at USPTO website – <http://www.uspto.gov>

Note: Abandonment takes place by operation of law for failure to reply to an Office action or timely pay the issue fee, not by operation of the mailing of a Notice of Abandonment.
